▶ National Parks in danger:
Land use changes around
National Parks. The case
study of Fruška gora
National Park

-Land use outside of the National Parks impacts land use changes inside of it

-Human activities accumulate

-Human activity vs nature protection

- Fruška gora National Park – No settlements inside the NP
- Over 20 settlements around (on the border) the NP
- Agriculture as the main LU endangering NP forests
- LU 1990-2019 – determination of links and main drivers of LUC
- Model for LUC for the future
